## HAIR ANALYSIS PROGRAM<sup>\*^</sup>

### INTRODUCTION

After receiving phone calls from all over the country, I decided I had to develop a way to help patients that were unable to come into my office. I discovered, through my research, that hair analysis allows me to duplicate the successes for my patients without them having them come to my office. This process allows me to help anyone, anywhere in the United States.

Here's how it works. You will send to my office your hair sample and I will analyze the sample to see if my concentrated traditional liquid herbs can help you. The analysis will determine why your body isn't functioning properly and I can recommend the proper herbal formulas that will help you get back to optimum health.

### PET OWNERS, TOO!

Pet owners have asked me if my herbal program can help their pets. I have been able to use the hair analysis technique to help many different animals, for example horses, dogs, cats and rabbits. The herbal teas have helped animals the same way that the teas have helped people.

Horses, for example, have obtained relief from colic, hoof disease, auto-immune disease, hormonal problems, and seizures. Cats, dogs and other domestic animals suffer from unexplained paralysis, rashes and other chronic health conditions. My concentrated liquid herbs work to build the immune system and promote healing so that noticeable improvements of the various negative effects start turning around. I have used hair analysis to help animals regain optimal health.

***You do not have to come into the office. We can send teas to you.***

**Instructions for beginning this program are on the reverse side of this document.**
